

Assignment 6. 30% Literature review.

Write a literature review for a possible/potential educational research project, maximum six pages in length. In addition, provide a literature map (exemplars pp. 137-8). *Note: It's fine if the map is created by hand.*

For this assignment, please construct a study-by study review, *not* a thematic review (see p. 140).

N.B. Ensure the articles are reports of original empirical (quantitative or qualitative) research and not theoretical/conceptual discussions or literature reviews.

Process:

- Describe 4-5 research articles in detail
- Include in the description of each study: research problem, question, data collection, summary of results (probably one paragraph for each study).
- Link study summaries using transitional sentences and explain how the studies relate to each other.
- Introduce the literature review, and close with a summary.
- It may be appropriate to organize study descriptions under subheadings (even if it is only one or two study descriptions per heading).

Use APA formatting throughout. Use the example paper at the end of the textbook (pp. 481-486) as an exemplar for formatting, e.g., level headings, etc. *For info specifically about APA headings see p. 139.*
